

He is very quiet and much laid back. But he is a scholarly landscaper and the Assistant Town Planner. There are ideas, imaginations and natural wisdom in him. Dave Flynn has been an asset for Kings Park creations ever since he came back from college. The Flynn family has been a part of Kings Park for over 100 years. Larry Flynn and David, cousins, have made their marks on the town.

Just tie David with his wife, Caroline, and you have nature coming alive to teach us all about what this town is made of. In the Heritage Museum there is an educational display on life in Kings Park through nature. With David's help, Caroline has written a three dimensional story. David has joined Joe Piacentino in restoring the Museum's Websites. These sites are educational centers and information havens. Joe and David and a group of interns intend to make this the town's "go to" site. History, school, ideas, and anyone's thoughts of the past are what it's about.

One way or the other, David Flynn will make his knowledge a part of this history of Kings Park. The Museum has just scratched the surface of David. Someday David will run the Heritage Museum.
