

A Kings Park High School, Class of 1980, graduate, Steve Weber continued his education at Oswego State College graduating in 1986. His career followed the rapid development within the computer field. His *Arts and Letters* talents have continued to express extensive creativity.

Through his business, Weber Systems Incorporated, Steve has created web sites for countless companies, organizations, as well as the Town of Smithtown. His emotional presentations of Memorial Day, nostalgic railroad memories, somberness of State Hospital settings and much cherished profiles of community individuals achieving success and notoriety have become much sought after classics.

Through a great deal of skill and creativity, Steve has made the computer a classic art form in Kings Park. Web sites developed and maintained by him for the Kings Park Chamber of Commerce and for the Kings Park Heritage Museum have become classics in promoting positive attributes of a society.

A token of the praise he deserves was provided by an award at the Village Film Festival, held in Florida. His documentary was selected as "Best in the Field". Greek classics listed five art forms, Steve's computer creations have created a sixth form.
